PRATIK S KANOJ

Laxmeshwar, Karnataka, India
+91 7483740785 | pratiksk0077@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science (AI & ML) undergraduate with strong academic performance and hands-on experience in Machine Learning, Python, and Full Stack Development. Passionate about building intelligent systems and solving real-world problems using data-driven approaches. Quick learner with leadership qualities and strong analytical skills. Seeking internship or entry-level opportunities in AI/ML and software development.

PROJECTS

Falcon AI (Intelligent Stampede Detection System)

Tech Stack: Python, TensorFlow, FastAPI, React, OpenCV, Twilio

- Engineered an AI-powered surveillance system for real-time crowd behavior analysis to detect early signs of stampedes.
- Implemented an unsupervised TensorFlow Autoencoder combined with Optical Flow tracking to autonomously identify anomalous kinetic energy patterns without relying on facial recognition.
- Integrated a FastAPI backend and Twilio Voice API to instantly trigger out-of-band emergency dispatch protocols when dynamic MSE risk thresholds are breached.

AI Hematologist

Tech Stack: Python, PyTorch, OpenCV, Data Analytics

- Developed an AI-powered diagnostic tool to analyze blood sample imagery and detect hematological anomalies.
- Implemented deep learning models for the accurate classification and segmentation of blood cells.

Hospital Management System Using Digital Twin

Tech Stack: Python, IoT Frameworks, Data Analytics

- Developed a digital twin framework to simulate hospital operations and optimize resource allocation.
- Integrated real-time data monitoring to improve patient care workflows and overall operational efficiency.

Accident Detection and AI Alert System

Tech Stack: Python, OpenCV, YOLO, Alert APIs

- Created an AI-based surveillance model to automatically detect road accidents using computer vision.
- Implemented an automated alert mechanism to notify emergency services rapidly upon accident detection.

TECHNICAL SKILLS

Programming Languages: Python, C, TypeScript

Core Areas: Machine Learning, Artificial Intelligence, NLP, Computer Vision

Web Technologies: HTML, CSS, JavaScript, Bootstrap, React, Node.js

Database: SQL (Basics), MongoDB

Tools: Git, VS Code, Jupyter Notebook

CERTIFICATIONS

- Basics of Web Development - Udemy
- Cloud Computing Fundamentals - IBM SkillsBuild
- AWS Academy Cloud Foundations - AWS
- Linux for Beginners - Infosys Springboard
- Linux Practical: Development with Linux - Infosys Springboard

EDUCATION

Dayananda Sagar University, Bangalore — Expected: 2027
B.Tech - CSE (Artificial Intelligence & Machine Learning) | CGPA: 7.66

Prerana Residential PU College, Hubli — 2021-2023
Higher Secondary Education (PUC-PCMB) | Percentage: 92.64%

Oxford School, Laxmeshwar — 2021
Secondary School Leaving Certificate (SSLC) | Percentage: 92.16%
